Subject: RE: emissions from AK Steel

Thanks Marta. I'll circulate a scheduler for a meeting with Ohio tomorrow as soon as I hear back from them.

Subject: RE: emissions from AK Steel

Gina, ATSDR came up after our meeting to discuss the data. Their reaction was that this was "very very concerning for exposure" and they would view this as an urgent health hazard. They are willing to expedite a letter of opinion if that is what ARD needs. Additional monitoring data, particularly temporal data, would strengthen their position.

ATSDR will be contacting the Hamilton County Health Department to see if they've been getting any complaints or have any information to offer, in addition to contacting OSHA to see if there have been any recent worker violations. They are concerned about worker exposure.

We'll continue to work through the data and will looking out for the call with the OH folks tomorrow regarding their monitoring.

Thanks, Marta. I'll be calling in for today's meeting. Is there a conference line, or do you mind looping me in? I'm at 3-6956.

Thanks,
Gina

Thanks – there's some nice correlation of BEN and NO2 coming off what I believe is the coke battery.

Marta,

Yes. AK will emit NO2 from several areas of the plant, including the coke plant.

Thanks,

Gina

Gina, just to confirm – we would expect to see emissions of NO2 coming from AK Steel?
